Colocation

Host your servers in a safe, secured fully equipped environment connected to a high bandwidth communication backbone network.

We offer you a range of colocation options to host your servers (web/mail/CRM, etc.) in our green data centre with a minimum of cost and complexity.

Who needs colocation?

- Enterprises looking for more server space due to limited IT room space
- Companies looking for a greener, power efficient solution for their existing servers
- Businessmen concerned with security of their servers

What are the key benefits?

- Hassle free operations as you no longer need to deploy, operate and maintain IT infrastructure on your site
- Fast deployment of your servers
- Managed high bandwidth end to end connectivity to access cloud services on private, public and hybrid environments
- Scalable solution with flexible pricing schemes:
 - per U based pricing models or
 - full racks pricing model with a choice of power consumption
- Monitoring and alerting options are available to ensure business continuity
