Audio conferencing

Keep in touch with your business contacts

Audio conferencing allows multiple parties to connect on an audio conference bridge from different locations using phones or computers.

Mauritius Telecom's audio conference service facilitates the scheduling of conference calls with up to 100 participants from any national or international, fixed or mobile network or by simply using a web browser on your laptop.

The service offers a simple and professional way to get in touch with partners and team members wherever they are located.

Audio conferencing enables a business client to ensure efficient and fast decision-making.

Benefits

- Improve interactivity through virtual meetings with your local or international business contacts
- Pull together the team at short notice
- Plan a meeting in advance
- Save on travelling expenses
- Access the conference call from any national or international, fixed or mobile network, or from a browser
- Customise conference access codes for secured meetings
- Service available 24 hours a day / 7 days a week
- Conferences can recur at configurable intervals (daily, weekly, monthly...)

Tailor-made offers to suit your unique needs...

Pay As You Go Conferencing

- For occasional users who need to schedule a conference on the go
- Book for conference calls via Mauritius Telecom as and when needed
- Customer pays a per minute tariff per participant (calling lines)

Booking Conferencing

- For regular usage where the customer has access on the interface
- Provides flexibility and control
- Schedule conference calls directly on the system
- Modify conference details as and when required
- Customer pays a monthly rental plus a per minute tariff per participant (calling lines)

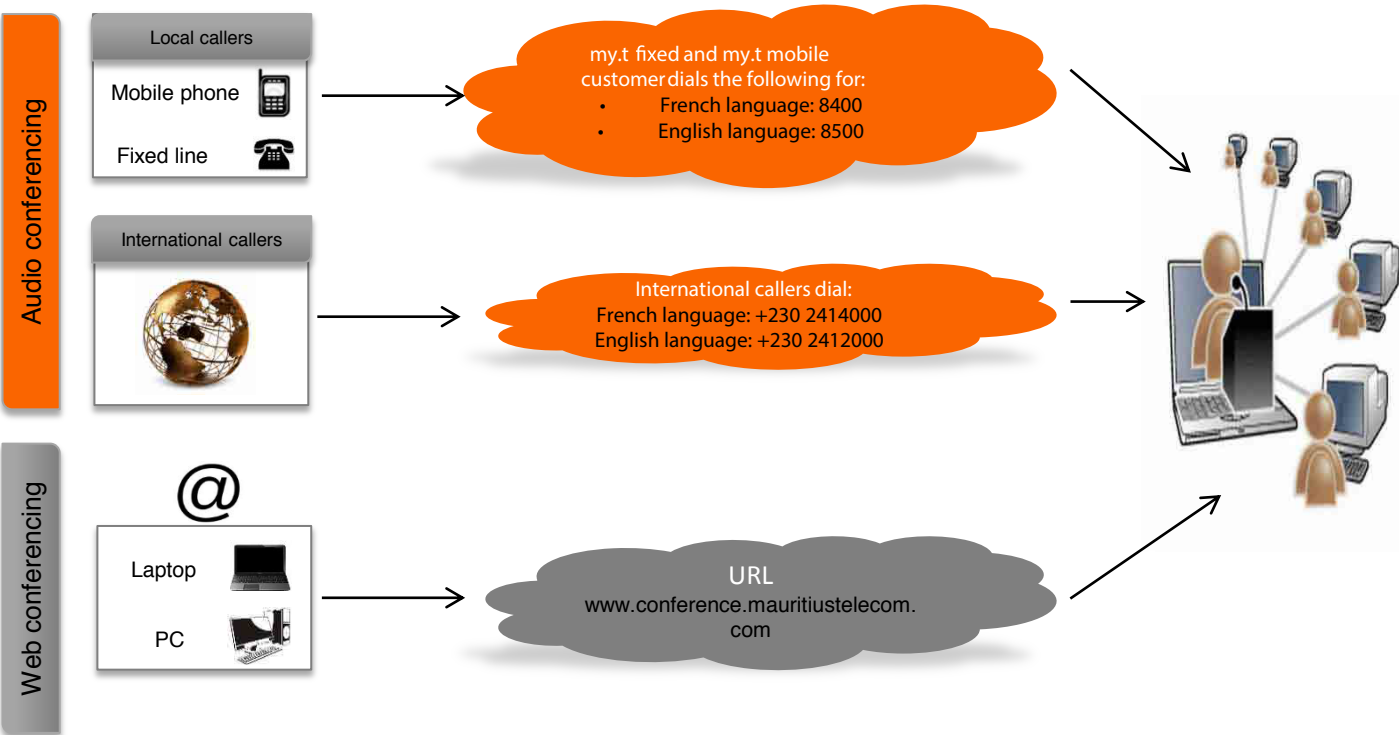

Advanced features

Enjoy an exhaustive number of advanced features FREE of charge to optimise your conferencing capabilities:

- Record your conference so that the minutes of the meeting can be drafted at your own convenience or an absent participant can get an update of useful developments during the conference call
- Ease of understanding through live presentations
- Enhance discussion using an interactive whiteboard
- Lock the conference to make sure no other participant join in
- Create polls for better integration
- Use mute/unmute/lecture mode to reduce background noise
- Microsoft Outlook can be used to send invitations

How to use the Audio Conferencing Service?

- In order to access the service, my.t Fixed and my.t mobile customer may either dial the short codes provided and / or type the URL provided by Mauritius Telecom for web conferencing facilities (online presentations, desktop sharing, ...).
- Participants, accessing the Audio Conference bridge from abroad, must dial the fixed Audio Conference number provided for international callers
